## DRY SHIPPER AGREEMENT

A credit card number is required for shipment of frozen semen. There is a \$175 frozen semen handling and dry shipper rental fee and \$999 deposit required for use of a dry shipper to transport frozen semen. This fee includes appropriate filling of the tank with liquid nitrogen and use for five business days. The fee for preparation of semen to be transferred to another facility for storage is an additional \$30.50. If the shipper is not returned within five business days, a \$15/day charge will accrue until day seven at which time a forfeiture of the deposit will occur. The deposit will not be charged unless the tank is not returned or is returned damaged through no fault of the shipping company.

Shipments requested without three business days notice are considered RUSH shipments and incur an additional \$88 fee. International shipments require additional preparation time and documentation and are assessed a \$55 processing fee.

Shipping charges will be assessed in addition to the rental, preparation and processing fees. Actual shipping fees are dependent on location and will be charged to the credit card number you provide; alternatively, shipping charges may be placed on an individual FedEx, DHL or UPS account.
